Shark divers will wake up to a delicious breakfast and a movie marathon in the galley salon. # WHAT TO PACK?

## CLOTHING:

- Temperatures at Guadalupe Island can vary greatly throughout the day. Mornings and evenings can be cool, in the low to mid-60s, while midday can reach temperatures in the 70s or 80s. The earlier in the fall your trip is, the warmer the weather will likely be.
- Layers are the best way to deal with wide ranging temperatures. A jacket, sweatshirt or lined windbreaker will be helpful if a breeze picks up. You might want to bring a couple pairs of long pants for the cooler evenings, especially after being in the water all day.
- Dress is very informal aboard the boat. Most guests will be in t-shirts, shorts/pants and flip-flops.

## PERSONAL ITEMS:

- Sunscreen (MUST be Biodegradable, see our picks on the last page)
- Polarized Sunglasses (for onboard viewing of sharks)
- Towel (bring both bath and beach size)
- Binoculars
- Seasickness Prevention
- Any Medication Needed
- USB flash drive or external hard drive (for photo sharing)
- Books/Music/Tablet/Laptop
- Refillable water bottle (reverse osmosis filtered water on board)
- Other Toiletries (shampoo, conditioner & body wash are provided)

## DIVE GEAR:

- Water temperatures at Guadalupe range from 64 to 75 degrees in the fall. **If you are bringing your own wetsuit, we recommend 5mm-7mm with hood, booties and gloves.**
- Wetsuits provided by Islander Charters are 7mm one piece rental suits that zip up the back. Hoods, booties and gloves are also provided but many divers go without these.
- Weight systems are harness type with up to 40 pounds of weight so divers are negatively buoyant and are able to walk around in the cage as if they are on land.
- Regulators are standard second stages and air is surface supplied.
- **Islander Charters recommends you bring your own mask to ensure a perfect fit.** Although we provide quality masks, we cannot emphasize enough the importance of having a mask that properly fits your individual face. Please feel free to bring your own.

## UNDERWATER CAMERAS:

Don't forget this most important item! Capture the sharks and your memories with an underwater camera. There is a large variety on the market today. Many of our passengers bring GoPros for great action shots but Amazon and other outlets sell quality underwater cameras for much less. Most people bring their laptops and flash drive to share photos during the down time. Another diver might get the best shot of you with a Great White and vice versa. Everyone develops a sense of camaraderie as you bond in the galley salon each evening and during travel.

## Frequently Asked Questions:

### Q: Will I get sea sick?

A: The voyage is a 200 mile open-ocean crossing and the journey is not like a large cruise ship that motors close to the coast. The *Islander* was designed and built specifically for the waters of Baja California and you will feel the motion of the ocean. If you are prone to motion sickness, you will want to take preventative measures. The transdermal patch or over-the-counter drugs work well for most people if administered at least two hours prior to departure. Please note these methods are preventative and will not work once seasick. We recommend speaking to a doctor or pharmacist regarding interactions with other medication you may be taking. We have travel sickness bags. Please ask the crew if you want some - no need to be embarrassed! It happens on every trip. **Once the boat is anchored at the island, seasickness subsides and you can enjoy the trip.**

### Q: Should I pack my own snacks or beverages?

A: You will not go hungry on this dive trip! Hearty restaurant quality meals are served three times daily. Dinners range from California tri-tips to fresh fish dishes. Additionally, mid-morning and afternoon snacks are prepared each day. Fresh fruit & other munchies can be grabbed from the galley anytime. Soft drinks, teas, hot cocoa and coffee are available from the beverage bar around the clock. Beer and wine are included once you have finished diving for the day. We accommodate for vegetarian, vegan, and dairy/nut/gluten free allergies. If you have dietary restrictions or a special diet, please make a note of it in the area on the questionnaire.

### Q: What are the staterooms & baths like?

A: A virtual tour of the *Islander* can be found on our website (hover over 'Trip Details' tab, click on 'Vessel Details' for video and other pictures). Rooms are compact, with bunk style sleeping berths as on most dive liveaboards. Clean linens, pillows and blankets are provided. Each room has a sink, a couple of drawers and a standard 120 volt outlet. There are also several plugs with USB ports in the salon area for charging needs. Two full baths are located on the main deck. We provide shampoo, conditioner, body wash, soap and blow dryers. An outdoor shower is available for rinsing. Jump in the hot tub to warm up and watch topside shark action or to see incredible star gazing at night!

### Q: Do I tip the crew, and if so, how much?

A: It is customary for liveaboard divers to leave a gratuity upon departure for a job well done. 10-15% is average.

### Q: Will there be wi-fi or cell phone service?

A: No, you are definitely off the grid on this trip! The island itself is uninhabited with the exception of some Mexican fishermen who live off generators. We have a satellite phone aboard the boat for emergencies, business calls or to check-in with family/friends. The cost for usage is \$2 per minute. The captain always has radio communication with our landing and the U.S. Coast Guard for emergency service. Once you board the boat, you do not disembark until the trip returns from Guadalupe Island.

**La Jolla Cove and La Jolla Shores** are north of PB in the exclusive community of La Jolla. High end shops and restaurants abound. Nearby is the **Scripps Birch Aquarium**, located next to UCSD and overlooking the La Jolla Shores. La Jolla Shores is a glorious stretch of white sand beaches.
